Unicode Charts for STIX Two Math v2.0.0

David M. Jones (on behalf of STIPUB)

Last modified June 19, 2018

These charts compare the coverage of version 2.0.0 of the STIX fonts against version 11.0 of the Unicode Standard.

Legend

- Characters shown in black (e.g., U+0021) are supported directly by the font.

- Characters shown in red (e.g., U+01CE) are not directly supported but can be synthesized by a Unicode-aware shaping engine. (These charts were generated with X$_{\exists}$T$_{E}$X 0.99999.)

  Note: Many of the characters in this category are poorly rendered because of deficiencies in the font's GPOS table. Plans are being made to address these problems.

- Grey squares (e.g., U+0380) indicate code points that are not assigned a meaning in Unicode 11.0.

- Otherwise blank squares that contain a code point (e.g., U+0020) indicate characters with no visible representation. These may or may not be zero-width characters; see the Unicode Standard for details.

- Completely blank squares (e.g., U+0181) indicate code points correspondinng to characters that STIX 2.0.0 does not support.

- Black squares (e.g., U+FFFE) indicate noncharacter code points.

Notes

- Not every composite character supported by the STIX fonts is included in these charts; only characters that are assigned a code point by Unicode 11.0 are shown. For example, you will not find "ẋ" in these charts since Unicode does not assign a code point to that character. It can, however, be composed from the sequence U+0078 LATIN SMALL LETTER X followed by U+0323 COMBINING DOT BELOW.

- Similarly, not every variant glyph of every character is displayed. See the STIX 2.0.0 release notes and accompanying documentation for more information on the OpenType font features and stylistic sets supported by STIX Two.

- Glyphs are shown at size 20 pt unless otherwise indicated.
